

GX 12/29 GEL

THE COMPACT STACKER WITH LONG AUTONOMY

This compact, powerful and robust stacker is the ideal solution for working in confined spaces.

The reduced width (800 mm), the lateral driving system and the wide mast positioning allow great manoeuvrability, stability and visibility.

Built-in battery charger with integrated cable and plug make it a plug and play unit!

GX GEL

The GEL version is equipped with long life GEL batteries, a tiller made with metal tube and ergonomic controls.

This configuration is the best value for money choice and grants long endurance type batteries.

GX12 Ge/ = +

MANOEUVRABILITY

The overall width is the same as the Europallet (800 mm) to allow working in narrow spaces and corridors, increasing manoeuvrability and reducing the turning radius. The combination of side guide, wide mast and low cover offer outstanding visibility.

TILLER

Fully integrated ergonomic tiller system including finger tip throttle and fork controls, safety pushbutton, horn and turtle button.

TURTLE MODE SWITCH

Offered as standard, this function enables operating the truck in confined spaces: it allows the unit to travel with the tiller in upright position.

This function is activated by pressing the turtle button on the tiller and rotating the drive control throttle. The truck travels at limited speed.

Release the button to disable this function.

COVER

Strong ABS cover with storage compartments on top, easily removable to speed up maintenance operations. The bottom access opening enables an immediate disassembly of motor wheel, portal and tiller without lifting the machine. Schuko plug with spiral cable for an easy battery charging.

MAST

Wide mast with sticker ruler enables the operator to easily check the forks elevation by sight.

BATTERY PACK GEL

The use of powerful high energy throughput GEL batteries makes the machine extremely flexible in every application, thanks to the multiples benefits of GEL technology, such as:

- 1. Maintenance-free (no topping up)
- 2. Long service life
- 3. High number of cycles (IEC 60254-1)
- 4. Extraordinary deep discharge protection
- 5. Low self discharge rate
- 6. Superior shelf life
- 7. No acid stratification
